

	Type A (Am, Aw) climates that are a bit drier are found to the north and south of the rain forest areas. They have distinct wet and dry seasons.	<b>A</b>	Mediterranean
	Type A (Af) climates, that are found in the center of the continent and along the eastern coast of Madagascar.	<b>B</b>	Savannah
	Type B (BSh, BSk) climates appear as one travels away from the Equator, either north or south, the savannah grades into drier steppe.	<b>C</b>	Tropical Rainforest
	Type B (BW <sub>h</sub> ) climates have little rainfall and wide differences between day and night temperatures. The Sahara in the north is the world's largest desert. The Kalahari in southern Africa covers an area larger than France.	<b>D</b>	Marine
	Type C (Cfa) climates, are found in the southwest.	<b>E</b>	Desert
	Type C (Cfb) climates are largely in the southeast.	<b>F</b>	Highland
	Type C (Csa) climates, mostly on the northwest (Mediterranean) coast and in the southeast	<b>G</b>	Steppe
	Type H climates are largely found in the east, below the Horn of Africa in areas with high elevations. These are not shown on the images.	<b>H</b>	Humid sub-tropical
